FS-1014 safe.

## Touchpad - Convenience and Simplicity Your Customers Want.

- Last coin alert with final minute indicator beeps for 15 seconds at the start of the last minute and flashes until shut off.
- Grace time option, allows for additional time even when meter shuts off. Option can be set either on or off.
- Beeps and displays amount as it is accepted. Automatically switches to countdown in seconds.
- Internal coin counter, viewable on LED display, is built into timer memory and can be reset using push button inside the case.
- Touchpad beeps when selection is made. Light indicates function is on.
- Soft touch works by resistance — there are no membrane switches that can be cut or severed by vandals.
- Exclusive overload feature (+/- 20%) ensures proper function with low voltage. Compensates for over or under power line loss or gain with 24v lines.
- High durability touch pad with separate overlay decal withstands direct blows from spray wands.
- Control circuitry allows you to choose any position for either a high or low pressure function. "Off" is always at the 9 o'clock position.
- Separate touch pad board allows flexibility of use with different timers.
- Digital display with 1" LED display.
- High capacity coin storage holds up to 400 coins or \$100.00. Ideal for volume wash that can't use security vaults.

## How's your visual impact?

In the bay is the most important place you can make an impact with your customer. We offer corrosion-resistant accessories such as 100% stainless steel overhead booms (including spring) 100% stainless steel wall booms or foam brush boom, aluminum boom extensions and colorful non-marking bay hoses.

Essential bay options such as mat holders and foaming brushes can be as unique and visually appealing as you choose. You need to identify with your customer and your drawing audience for the visual flavor you hope to produce. A clean, attractive bay and clean outward appearance encourage your customer to return.

Your image and visual presentation can be as sublime as the color-coordinated safety trigger gun, hose and high pressure wand in their hands. Even our spring wand holder and its springs are 100% stainless steel.

## Making you look good.

Informational signage is colorful, informative and simple. From meter decals to signage, the whole bay package is color-coordinated to present the perfect appearance and image. At Specialty Equipment Co., Inc., we don't just make good equipment. We make it look good so you can maximize your earning potential. Give us a call so we can put you in touch with one of our professional representatives.
