Hamilton Code Sys

System 1

- Hamilton's most economical system, designed for single bay automatic car washes.
- Cashless, code only wash entry system.
- Sell codes from inside your convenience store, or at the gas pumps.
- Includes user-friendly pedestal keypad, with large, easy-to-read 12-button interface, POS unit and Impact Printer.
- Stainless steel pedestal offers complete weather protection for the keypad.

As

It's never been easier for customers to purchase a car wash, thanks to Hamilton's new line of POS systems. Hamilton now offers four code systems that make buying and selling car washes as simple as 1-2-3-4.

4

Each user-friendly system gives your customers the convenience of choice and gives you the functionality and precision you need.

All Hamilton code systems provide fleet account and auditing capabilities, including reports on washes sold, washes redeemed, and total sales.

The optional remote POS units for the HCS 2 and 4 systems feature color touch screens with an easy-to-follow software interface.

System – As Easy As 1. 2. 3. 4.

System 2

- Cashless, code only wash initiation system.
- Optional wireless remote POS units allow you to sell wash codes from 14 different locations with four of those locations featuring pay-at-the-pump.
- The HCS system works in conjunction with the site controller allowing unlimited pumps per location to offer pay-at-the-pump.
- No limitations on distance.
- No physical limitations (no line of sight requirements).
- No infrastructure investment (no phone lines, RF connections or antennas).
- Fleet account function with thousands of different codes, giving you virtually unlimited fleet account capabilities.
- Includes user-friendly pedestal keypad, with large, easy-to-read 12-button interface, POS unit and Impact Printer.
- Stainless steel pedestal offers complete weather protection for the keypad.

System 3

- Customers can purchase washes at the wash bay using the popular Gold Line® Autocashier.
- Convenience of choice—customers can use cash, credit cards, tokens, Tokenotes® or codes issued from inside the convenience store or at the gas pumps.
- Cost effective POS system with Hamilton hand-held interface.
- The HCS 3 can be daisy-chained to multiple bays with Gold Line® ACW's. Codes can then be accepted at up to nine bays at that location.

System 4

- A fully functional wash initiation system that combines the convenience of the Autocashier and the optional wireless remote POS units.
- Using the Gold Line® Autocashier, customers can use cash, credit cards, tokens, Tokenotes® or codes issued from inside the convenience store or at the gas pumps to purchase washes.
- Optional wireless remote POS units allow you to sell wash codes from 14 different locations with four of those locations featuring pay-at-the-pump.
- The HCS system works in conjunction with the site controller allowing unlimited pumps per location to offer pay-at-the-pump.
- No limitations on distance.
- No physical limitations (no line of sight requirements).
- No infrastructure investment (no phone lines, RF connections or antennas).
- The HCS 4 can be daisy-chained to multiple bays with Gold Line® ACW's. Codes can then be accepted at up to nine bays at that location.
