

# Power to Profit

**INDUSTRIAL VACUUM SYSTEMS, INC.**

INCREDIBLY POWERFUL

# YOU NEED THE PROFIT PERFORMANCE OF **POWER VAC.**

Successful car wash owners rely on coin-op vacuums to build profitable operations. They know “vac” income generates the best return on investment and provides the greatest profit margins of any service offered in the industry.

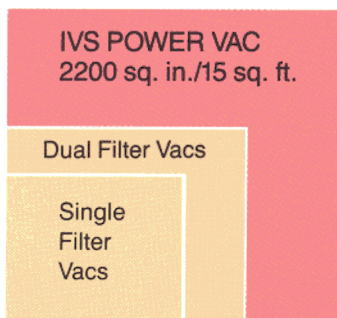

Virtually every market study confirms the power of the “vac island” to boost car wash income. Why not put full-power, vacuum money makers on your bottom line?

Coin-op vacuums generate revenue dollars for pennies per cycle.

## **POWER VAC IS THE ONLY CHOICE TO BOOST YOUR BUSINESS**

**POWER VAC** is designed and built with a single-minded purpose: to build your business. It's classic design is a familiar symbol of quality. Consumers trust **POWER VAC** to tackle their toughest cleaning jobs. Easy-to-understand instructions invite extra cycles and make **POWER VAC** convenient to use.

**POWER VAC'S** superior filter system maintains airflow at peak levels and keeps customers coming back — a “return” on investment that guarantees that your sales will multiply!

*Filter size = profit power.*

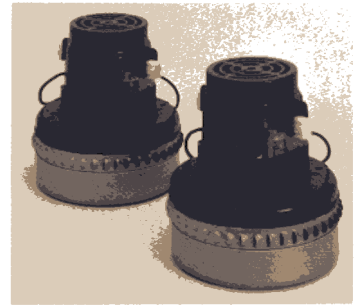

Optional Lighted, poly dome and debris catcher shown

## Super suction

Power Vac is *dual powered* with two Lamb motors that set industry standards for airflow, suction and durability. Optional three-motor units are available for *super* or special promotional vacuum merchandising.

## Largest filter system

The industry's largest filter system guarantees that your customers will enjoy consistently high performance. Our two-door design makes servicing quick, clean, and easy. Extended period between servicing eliminates down-time and curbs maintenance costs. Why cut corners and suffer with second-rate filter systems?

## Sure start vending

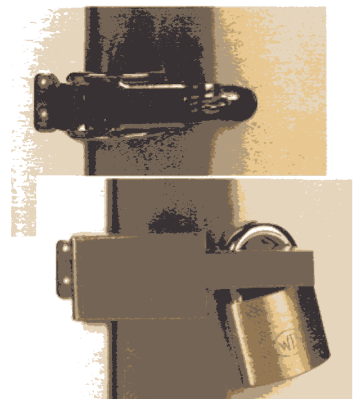

Standard electronic timer allows complete time and pricing flexibility to best suit your market. Unique, dual alternating outputs prevents costly down-time under the toughest loads. Optional timers offer extra-time options, coin and cycle counters. Available for new vacuums or upgrades to existing units to beef-up your revenue.

## Lock-in security

The armored lock and pin bolts through a rock-solid, 3/4" by 1-1/4" stainless bar stock as protection against theft and vandals. Optional locking systems are *field-upgradeable* (second quarter, 1992). Other units available for use with *in-ground* safes and vaults.

Option: Security latch covers protect service doors from tampering (see photo). Also fits other brands.

## POWER SPECIFICATIONS:

(standard equipment)

**Vacuum Motors:** Lamb, two stage, by-pass cooled motors, 7 amp (oper. avg., each)

**Input:** 15 amp., 120 VAC/60 Hz (20 amp. circuit required)
