Polycarbonate Doors

The Polycarbonate Door with all the benefits:

Unsurpassed Durability

Constructed of the toughest corrosion resistant materials available. Survivor™ doors feature state-of-the-art materials to provide maximum life and durability in the most demanding applications.

Reliable Operation

Designed for harsh, high use applications. Survivor™ doors superior design, materials and hardware ensure smooth, easy operation year-after-year.

Low Maintenance

Engineered and manufactured for minimal maintenance and service. Reduces annual costs and more profit for you.

Attractive

Distinct appearance attracts customers and enhances your building appearance. Clear, translucent design maximizes bay visibility and provides around-the-clock customer security & comfort.

Complete Weather Protection

Protects customers, vehicles, building interior and equipment from wind, cold weather and other hazards. Insulated sections offer thermal protection in any climate.

Advanced Materials... Superior Product.

518" Tri-wall Polycarbonate Panels

Tough, shatterproof, translucent polycarbonate panels are corrosion resistant and virtually indestructible.

Aluminum Alloy Frame

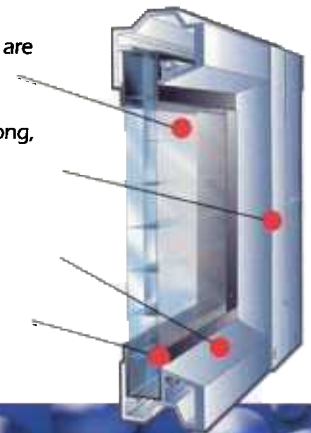

Corrosion resistant aluminum stiles and rails provide a strong, durable frame. Available in powdercoat color finish.

Beveled Aluminum Rails

Tongue & groove and beveled meeting rails shed moisture and eliminate watertraps.

Double Panel Seal

Double panel seal provides protection from moisture infiltration.

Platinum

PREMIUM MODEL

HARDWARE FEATURES

- Hinges/Hardware: 12 Ga. Stainless Steel
- Track: 3" Heavy Duty Stainless Steel
- Bearing Plates: 11 Gauge Stainless Steel
- Shaft: Solid, Keyed Stainless Steel
- Drums/Couplers: Nickel Plated
- Bearings: Greasable, Stainless Steel
- Cable: 5/32" Stainless Steel
- Rollers: MagnumXT™ Carwash Rollers
- Fasteners: Stainless Steel
- Torsion Spring Models- Stainless Steel

Gold

DELUXE MODEL

HARDWARE FEATURES

- Hinges/Hardware: 12 Ga. Stainless Steel
- Track: 3" Heavy Duty Galvanized
- Bearing Plates: 11 Gauge Stainless Steel
- Shaft: Solid, Keyed Stainless Steel
- Bearings: Greasable, Standard
- Cable: 5/32" Stainless Steel
- Rollers: Magnum™ Carwash Rollers
- Fasteners: Stainless Steel

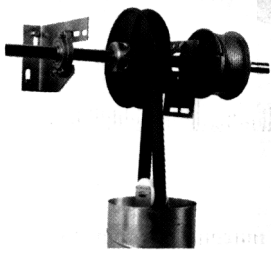

Silver

COMPETITIVE MODEL

HARDWARE FEATURES

- Hinges/Hardware: 11 Gauge Galvanized
- Track: 3" Heavy Duty Galvanized
- Bearing Plates: 11 Gauge Galvanized
- Shaft: Solid, Keyed Galvanized Steel
- Bearings: Greasable, Standard
- Cable: 5/32" Stainless Steel
- Rollers: Magnum™ Carwash Rollers
- Fasteners: Galvanized

Choose From 3 Counterbalance Systems

Strap Counterweight

Featuring a durable, rust-proof spool, aluminum winding hub, counterweight, guide tube and tough, virtually unbreakable reinforced nylon strap, this model offers you hundreds of thousands of cycles of smooth, quiet, and dependable operation of your door system in the most demanding conditions. The best selection for automatic car washes and other highly corrosive, high cycle situations where maximum life, low maintenance and reliability are essential. Totally adjustable. Best used with automated doors.

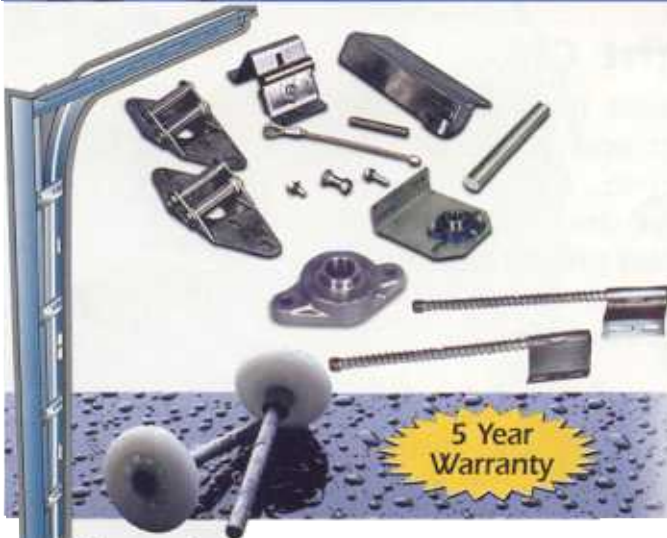

Cable Counterweight

The cable counterweight models feature an aluminum counterweight drum, counterweight, guide tube and stainless steel non-rotating cable for smooth, reliable operation of your door cycle after cycle in rigorous conditions. Use for doors that are oversized or match your existing system. Best used with automated doors.

Rust-Proof High Cycle Torsion Springs

Excellent for either manual or automated door systems, our high cycle spring models offer over 100,000 cycles of safe, smooth and perfectly balanced operation. Choose either our standard hot-dipped galvanized wire for standard protection or upgrade to totally rust-free stainless steel wire. Spring models provide you with 100% perfect balancing with no jarring and less cable spooling.

What Makes Survivor™ Products Better? Quality Components.

The Pioneer of Stainless Steel Track & Hardware

America's heavy duty stainless steel track and hardware were developed to give you the toughest rust-proof qualities in the industry. Select our Gold or Platinum models to ensure your door will withstand the test of time in the most punishing environments.

Incredibly tough, wear and crack resistant, our 3" track, bearing plates, bearings, shaft, cable, fasteners, 12 ga. face hardware and pusher springs are manufactured with high quality stainless steel. Provides you with the rust-free durability you need in wet, corrosive environments.

Magnum XT™ - Extreme Condition Rollers

The new Magnum XT (patent pending) roller ensures unequalled performance, reliability and maximum durability in the most extreme environments. The new design features a tough, maintenance-free high-density plastic raceway with stainless steel ball bearings that require zero lubrication and are guaranteed not to rust or seize-up. Specifically designed for wet, high cycle and corrosive environments; the unique Magnum XT bearing design results in lower friction providing quiet, smooth and free-turning operation cycle after cycle. Other features are high-strength, stainless steel stems and tough UHMW tire with new snap-lock design eliminating snap ring failure. Handles up to 52 lbs per roller!!

Guaranteed not to seize-up or rust!

5 Year Warranty

Outstanding Options

Full Vision Sections

Select from our crystal-clear 5/8" Plexiglas or our new bow-proof 5/8" Fluted full vision sections for maximum visibility, comfort and security. (Fluted Shown)

Powder Coat Finish

Match your color specifications with a tough, appealing powder-coated frame. Choose from a variety of colors to match your special theme.

Conveyor Cut-Outs

Custom designed for perfect alignment with your conveyor system

Nickel Plated Shaftline Components

Add years to the life of your counterbalance assembly with our rust-proofed drums, cones and couplers.

Stainless Steel Springs

Choose stainless steel wire on spring models for clean, rust-free durability and maximum performance in the toughest environments.
