

Stainless Steel Torsion Springs

Longer Lasting
Choose up to 100,000+ cycle for more service time and less replacement.

Rust-Proof
Manufactured with tough 302 stainless steel wire for complete rust-free qualities in any environment.

Variety
Offered in 2", 2-5/8", 3-3/4" and 6" Diameters and a large selection of wire sizes.

Clean
Stainless steel wire eliminates rusty drip-down in wet and corrosive areas.

Maintains Torque
Maintains constant torque over the cycle life-time of the spring.

Galvanized Torsion Springs

Longer Lasting
Computer engineered to last 22,500 cycle standard, double the industry standard. 50,000, 100,00 and other high cycle life available for frequently used doors.

Corrosion Resistant
Hot-dipped, zinc galvanized steel reduces rust and corrosion.

Variety
Same-day shipment on hundreds of sizes. 2", 2-5/8" and 3-3/4" diameters available.

Coded
Color-coded paint stripe for fast identification and easy winding count.

Clean
Hot-dipped, zinc galvanized steel reduces ugly drip-down associated with high moisture areas.
